

ClearSy opens 2008 with a number of news items and projects.

Among them, we can cite the creation of a new site dedicated to the DOF1 project, as well as ClearSy's participation of the Conférence B in Nantes, which will be held on 16th June 2008...

As regards projects, these will be presented in this letter:

The OISAU project (Opening and Interoperability for Autonomous Systems), which brings together numerous actors from the industrial and military sector,

The Urbalis Evolution project, in collaboration with Alstom Transport, which is concerned with the Peking metro.

The Ouragan project, which targets the creation of onboard software, enables the piloting of the line 5 metros in the RATP network.

There are now 1610 of you reading this letter. Thank you for your interest and happy reading.

New site dedicated to the DOF1 project

ClearSy has been able to offer you the brand new DOF1 site since the start of February, a project site dedicated to the Opening and Closing Device on the platform fronts, SIL4. Access to the site : Dof1.eu
